## The Analysis of Advanced Development of Smart Classroom Teaching model

Yu Ying, Chen Wenwen

( School of Communication and Media, Qufu Normal University, Rizhao Shandong 276826)

**Abstract:**

into three stages, and then proposes an advanced approach to the design of smart classroom teaching model which is compatible with teaching model as an example. The implementation shows that the advanced design of smart classroom teaching model is in line with current frontline teaching practice and provides a possibility for the practical transformation to smart teaching.

## An Empirical Study on Internet Use Preference of Urban and Rural Students from the Perspective of Educational Equity

Zhang Jizhou<sup>1</sup>, Huang Shuguang<sup>2</sup>

(1.The Department of Education, Ludong University, Yantai Shandong 264025; 2.The Department of Education, East China Normal University, Shanghai 264025)

**Abstract:** The information promotion of education equity is an important support for our country to realize the modernization of

education in the “information gap” has the most hidden, it covers inequality between urban and rural students education result. It is necessary to promote the balanced construction of urban and rural education information from the perspective of the substantial equity of urban and rural education information.
